

Evaluation of Style Advisor Performance

A Comprehensive Data-Driven Diagnostic Report & Strategic Road Map for Excellence in
Premium Retail Service Delivery

Strategic Context & Objectives

Aligning retail operational standards with customer-centric excellence.

Executive Project Overview & Scope

Project Mission

- Evaluate multi-stage performance of Style Advisors across store audits.
- Analyze operational metrics from store ambiance to closure.
- Pinpoint geographical excellence and operational performance gaps.
- Deliver actionable, data-backed management recommendations.

Analytical Scope

- **Performance Grading:** Multi-tier classification of advisors.
- **Zonal Breakdown:** Regional score benchmarks and comparisons.
- **Behavioral Audit:** Assessing Discovery, Trial, and Upselling gaps.
- **Time Analytics:** Tracking monthly performance fluctuations.

Performance Grading Methodology

Performance Tier	Score Parameter	Operational Implication	Excel Logic Formulation
High Performer	90% - 100%	Exceeds all service expectations; primary brand ambassador.	=IFS(C2>=90, "High Performer", ...)
Average Performer	70% - 89%	Meets baseline criteria; requires targeted enhancement.	=IFS(..., C2>=70, "Average Performer", ...)
Low Performer	50% - 69%	Struggles with advanced sales and conversion tactics.	=IFS(..., C2>=50, "Low Performer", ...)
Bottom Performer	Below 50%	Critical risk; requires immediate intervention or PIP.	=IFS(..., C2<50, "Bottom Performer")

Regional Analysis & Insights

Uncovering geographical hubs of excellence and critical areas of concern.

Average Evaluation Scores by Zone

The North Zone sets the organizational benchmark at 77, while the South Zone lags behind at 67, highlighting significant regional variance in service execution.

| Concentration of Top Talent (High Performers)

60%

Concentrated in Top 3 States
(UP, Maharashtra, Tamil Nadu)

Key Geographical Highlights

- **North Zone Leadership:** Houses 40% of all high performers, driven predominantly by Uttar Pradesh (20%).
- **Regional Anchors:** Maharashtra (West) and Tamil Nadu (South) each contribute 20% to the high-performer pool.
- **Orissa Excellence:** Achieves the highest single-state quality score in the country at 94.

Core Competency Gap: High vs. Bottom Performers

Store Ambiance

High: 97%

Low: 88%

Basic maintenance and operational checklists are universally well-maintained across tiers.

Discovery & Needs

High: 98%

Low: 53%

The single largest drop-off point. Advisors struggle with proactive, open-ended customer profiling.

Trial & Upselling

High: 96%

Low: 49%

Crucial conversion gap. Low performers fail to cross-sell and promote brand programs effectively.

Strategic Recommendations

Actionable initiatives to bridge gaps and scale enterprise-wide excellence.

Roadmap for Operational Transformation

1. Targeted Sales Enablement

- Implement scenario-based role-play modules focused entirely on **Discovery** and **Objection Handling**.
- Move teams beyond transactional greetings into solution-oriented styling conversations.

2. Centers of Excellence & Mentorship

- Establish peer-shadowing programs pairing struggling branches (e.g., Assam, MP) with top hubs in UP and Orissa.
- Deploy 2-week virtual mentorship sprints to humanize high-score behaviors.

Immediate Management Interventions

Audit Zero-Score Outliers

- Conduct immediate root-cause audits for advisors maintaining pristine store ambiance scores but logging a **0 overall experience**.
- Address critical behavioral deal-breakers or attendance gaps through structured PIPs.

Just-in-Time Micro-Learning

- Combat monthly performance volatility (notably mid-month troughs around October 20th) via in-store tablet refreshers.
- Sustain engagement through proactive support before fatigue sets in.

Questions & Discussion

Thank you for your attention. Let's elevate customer experience together.
